

Day 5 Loops

Data Science Internship - Python Week 1

What I Learned:

Learned for loop and while loop. Practiced repeating tasks and printing multiple values.

Practical Work:

I wrote and tested Python programs related to this topic. The code screenshot below shows my practice work.

Code Practice Screenshot:

Learning Outcome:

After completing this task, I improved my Python programming skills and understood how this concept is useful in Data Science projects.

A screenshot of a Visual Studio Code editor window with a dark theme. The title bar at the top reads "Visual StudioCode - Python". The editor contains two Python code snippets. The first is a for loop:

```
for i in range(5):  
    print(i)
```

 The second is a while loop:

```
count = 0  
while count < 3:  
    print(count)  
    count += 1
```
